* While CBE #0753 is a single-harmonized measure containing SSI data for both colon and abdominal hysterectomies, the data are reported specific to each surgery on the PCH Report; therefore, it has two PCH numbers, PCH-6 (SSI-colon) and PCH-7 (SSI-hysterectomy).

‖ While PCH-30 and PCH-31 are part of a single measure, Admissions and Emergency Department (ED) Visits for Patients Receiving Outpatient Chemotherapy, there are two rates reported. PCH-30 is the risk-standardized admission rate, and PCH-31 is the risk-standardized ED visit rate.
