Subject: Report Update: EDAC Hospital-Specific Reports and Measure Details

Announcement from the Centers for Medicare & Medicaid Services (CMS):

Following the release of Hospital-Specific Reports (HSR) and measure details in July 2026, issues were identified impacting the Excess Days in Acute Care (EDAC) reports. The issues have been resolved and updated HSRs and measure details are now available in the Hospital Quality Reporting (HQR) System.

Details on corrections are as follows:

- Updated the performance overview, index stay summary, and patient-level summary reports so patient populations and returned-patient counts reconcile across the three report subcategories (AMI, HF, and PN)
- Corrected how return events at another facility are attributed and displayed
- Updated event details and exclusion handling so information is presented consistently across the reports

There will not be any Annual Payment Update (APU) or payment consequence for impacted facilities. Please re-review or redownload your reports to view the updates. If issues persist, please contact [CCSQ Service Center](#).
